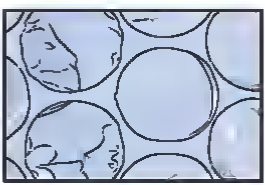
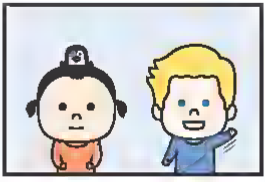
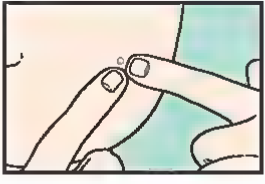
Someone like that

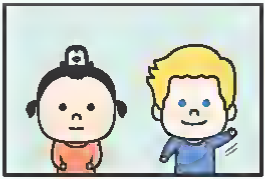


Who does want to pop the bubbles
when you see bubble wrap?

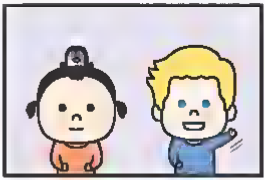




Who does not want to squeeze a pimple
if you get one on your face?



Who does want to scratch off a scab
if you see it on your body?



Mev is someone like that.

Then one day

Once in a while, I applied
a black nose strip on my nose.

Stick it on the wet nose

-

Wait for it to dry

-

Remove the strip

Time was up so
I decided to remove the strip.

However, it didn't work perfectly

I tried to get rid of the sticky stuff on my nose by rinsing it with water.

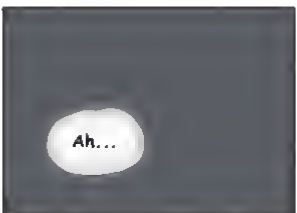
Unfortunately, some black bits stuck in my opened pore.

I rubbed them with face cleanser, wiped it with a tissue, and squeeze it too, but it never come off.

I didn't mind too much.

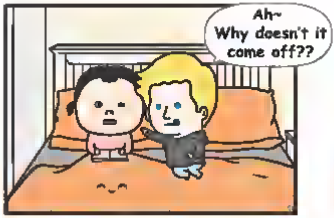
That evening

I quickly fell asleep.

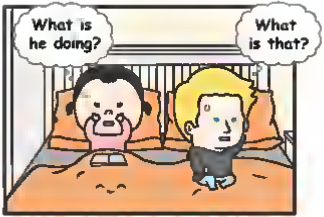


Ah...

Something..



My nose was being scratched



Both of us puzzled.
